I am an over the road trucker who travels all over the country and I find the services offered to me by xm radio regarding the weather and traffic to be most helpful. By listening to this information I can usually avoid any traffic jams thus helping myself as well as local commuters. I've only had this service for a short while and the traffic and weather was the main reason for getting it. I highly oppose HR4026. I am paying for this service and no one should dictate to me what I should or should not have.
